RE: **Questions & Answers**
Contract ID: DN11542028
County: Haywood
Letting Date: December 8, 2015

A bidder has posed the following questions for the above contract; the associated answers have been provided for purposes of providing clarity as to the intent of the contract.

Question #1 – Is it a requirement to have a minimum 6 long arm tractor mowers working in each county for each contract or will 2 be satisfactory?

Answer #1 - 6 are required to start.

Question #2 – If a minimum of 6 long arms are required, will the contractor be permitted to start with less than 6 until more can be mobilized, in the event the contractor has his machines on other projects when he starts?

Answer #2 - 6 are required to start per contract.

Question #3 – Will flaggers be required on any of these Long Arm Mowing contracts?

Answer #3 – no.

Question #4 – Can the DOT provide a road list or map of the routes intended for each contract?

Answer #4 - Dot county maps can be provided but it covers all secondary routes paved and unpaved.

Question #5 – Will all the roads on these contracts be secondary?

Answer #5 – yes.

Question #6 – If a contractor is awarded multiple contracts, can they perform them one at a time?

Answer #6 - yes as long as the terms of the each contract are fulfilled (time requirements)

These revisions do not change bid items or the associated quantities.

Please insert this letter into the addendum section of the proposal and sign the verification. Thank you for your attention to this matter.
